## SafeGuard i-Frame™

The ideal technology mount for the iPad 2, 3, 4 and Air generations

The i-Frame combines those all-important aesthetic looks with a practicality that makes it ideal for desk, wall and floor mounted applications throughout retail and hospitality environments. Additionally, the i-Frame is highly suitable for mobile use, offering both protection of hardware and improved handling through lightweight materials and exclusive finishes.

The omni-channel retail experience has to focus on maximizing the customer experience, and i-Frame, with its black, white or aluminum fascia, ensures a secure mount for both mobile and static customer facing applications.

Security and flexibility is key, and i-Frame offers a range of features protecting the iPad from misuse, damage and theft. The enclosure's design limits access to cables, connections, power and volume buttons, and the casing allows the attachment of our ClickSafe® range of security tethers.

The i-Frame brings a new level of design and functionality to iPad mounts and enclosures. With applications being driven by the need for greater customer service and the provision of instant information from the web or apps, i-Frame ensures the basic principles that drove the development of the iPad are kept while enabling what is essentially a consumer device, to deliver business solutions throughout the store. The i-Frame is offered with a wide range of mounting options and accessories to support versatile and contemporary use cases.

## Features

- Flexible - fits iPad generation 2, 3, 4 & air (with sleeve)
- Suitable for mobile use as well as fixed installations

	SPM119	Floorstand * For portrait to landscape functionality add SPA112 + SPA104
ACCESSORIES	SOLUTION	DESCRIPTION
	SPA113	Portrait to Landscape adaptor

# The UCS Intelligent Charging Station

Make sure your tablet is charged and safe with the Universal Intelligent Charging and Storage Solution for Tablets and USB devices. The design and function of SafeGuard UCS is targeted primarily at intelligent tablet charging and storage with or without protective casings such as the X-Frame.

It's important to make sure that any device being charged within the UCS unit will charge at the manufacturers recommended level, replicating what takes place when plugging your smart phone or tablet into the manufacturers own wall charger. The charging unit at the heart of our UCS solution will emulate the manufacturers charging profile and avoid potential battery life loss from over or under charging.

The SafeGuard UCS is available in three cabinet variants to cover a comprehensive range of use cases, with either charge or charge and sync capability.

SpacePole Inc.

SpacePole Inc, an Ergonomic Solutions group company, is an established, leading supplier of innovative and ergonomically designed technology mounting and mobility solutions, developed in partnership with global retailers and technology suppliers. Our application areas extend across POS, Payment, Digital Signage, Self Service, Mobility, Warehousing, Distribution and Logistics.

SpacePole Inc. is a channel focused business with customers and partners across the United States and Canada. Our services include design and development for customized solutions, our influential Ergonomics consultancy, which has advised many of the major global retailers, in addition to professional security and PCI compliance within the payment industry. Our SpacePole solutions, which are installed worldwide, are proven in the field; modular, enabling cost effective upgrades and provide both physical and tamper proof protection to hardware investments.
